Is your website mobile-friendly?

April 21st will see Google rankings being affected if your website is not Mobile-Friendly.

When Google's algorithm change comes into effect it will greatly preference websites that are responsive or have a mobile version & it will drop the ranking of sites that aren't mobile-friendly when searched from a mobile device.

“Starting April 21, we will be expanding our use of mobile-friendliness as a ranking signal. This change will affect mobile searches in all languages worldwide and will have a significant impact in our search results. Consequently, users will find it easier to get relevant, high quality search results that are optimized for their devices.”

My Latest Adventure - Mount Kosciuszko – Australia's

Highest Mountain 2,228 m

2,228 metres (7,310 ft) above sea level, Australia's Highest Mountain

Distance: 22km (loop) - Charlotte Pass to Blue Lake, Main Range & Summit Walk home. 2535 calories burnt.

It was freezing at the top, you can hear the wind in the clip, magical scenery, saw one black centipede, one black crow and a finch.

I was also visited the Australian War Memorial and Parliament House in Canberra before the Mountain hike.
